

SunHouse™

BASEMENT WINDOW ENCLOSURE

The SunHouse™ basement window enclosure will give you an attractive, bright, clean solution that keeps rain out, prevents weeds from growing inside, and reflects lots of natural light into your basement.

Basement Environment Specialists®

The bright, clean SunHouse™ and matching sturdy, clear cover will make a dramatic difference inside and outside of your home.

- Enclosed bottom prevents weed growth and keeps the inside clean
- Sturdy, clear cover is manufactured as a matching set with the SunHouse™, and keeps rain and water from overflowing gutters*
- Keeps window glass clean, and extends life of the window frame
- Prevents wind from blowing against basement windows, which are usually single pane glass
- Specially shaped sides, color and sloped bottom reflect as much light as possible into your basement
- Will never rot, rust or corrode
- Can be installed on all your basement windows

**While a SunHouse™ keeps most water out, it cannot warrant against window well flooding unless a Basement Systems WellDuct® is installed along with the SunHouse™. If flooding wells are a problem for you, ask your dealer for details.*

SIZE SELECTION GUIDE

- If top of window is 5" or less above grade, use flat cover
- If top of window is more than 5" above grade, use domed cover
- If bottom of window is 12" below grade or less, use shallow well
- If bottom of window is more than 12" below grade, use deep well
- Maximum overall window size is 24" high and 38" wide.
