

WaterGuard®

BASEMENT WATERPROOFING SYSTEM

The effective and reliable way to solve wet basement problems — permanently!

WaterGuard® is a piping system engineered specifically to solve basement water problems effectively without worry of clogging from soils under the floor.

The **WaterGuard®** system intercepts water at the perimeter of your basement and drains it unseen safely away. **WaterGuard®**, along with other Basement Systems products, will keep your basement clean and dry so you can use the space for storage, recreational purposes, or to finish for additional living space.

**OVER 21 MILLION FEET INSTALLED
ACROSS NORTH AMERICA!**

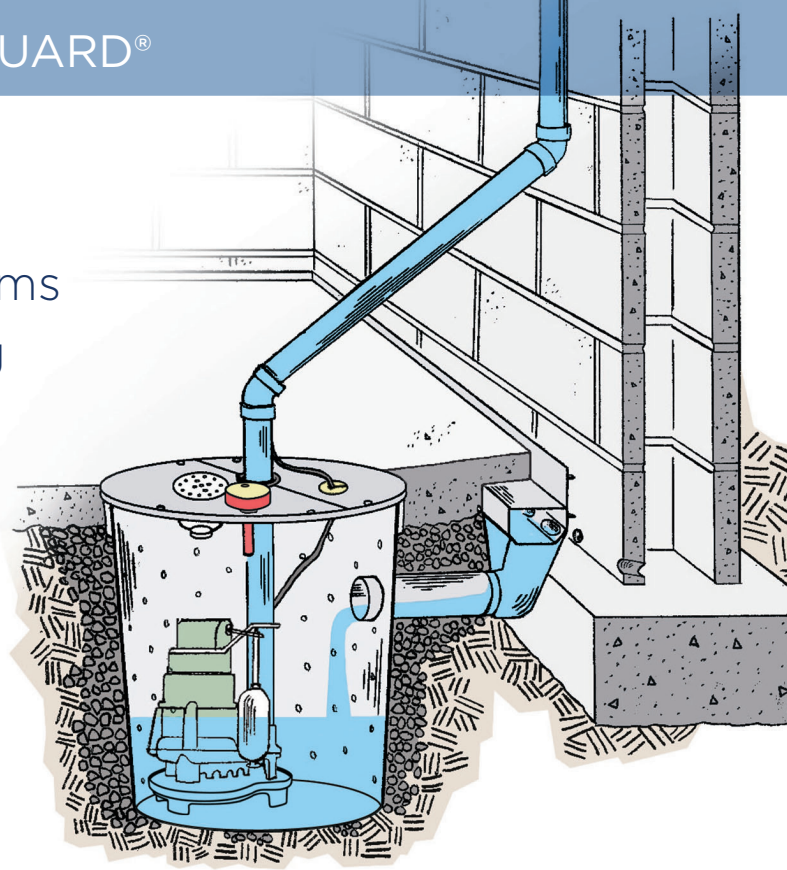

**Basement
Systems**
Basement Environment Specialists®

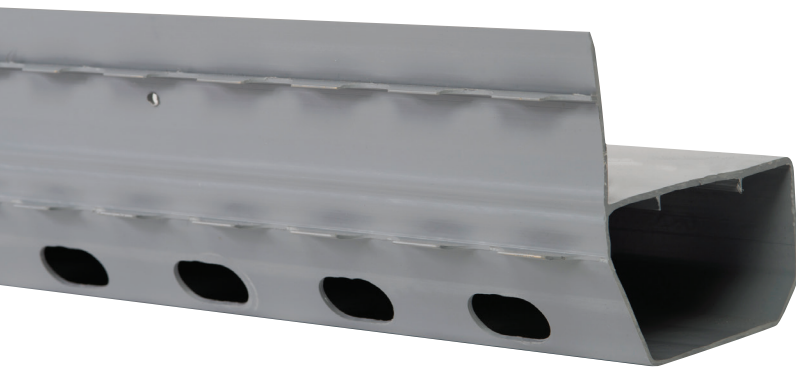

WaterGuard® is engineered not to sit in the dirt, so clogging from silt and sediment under the floor is not a problem!

WaterGuard® is a non-clogging alternative to other piping systems that sit in the soil and often clog

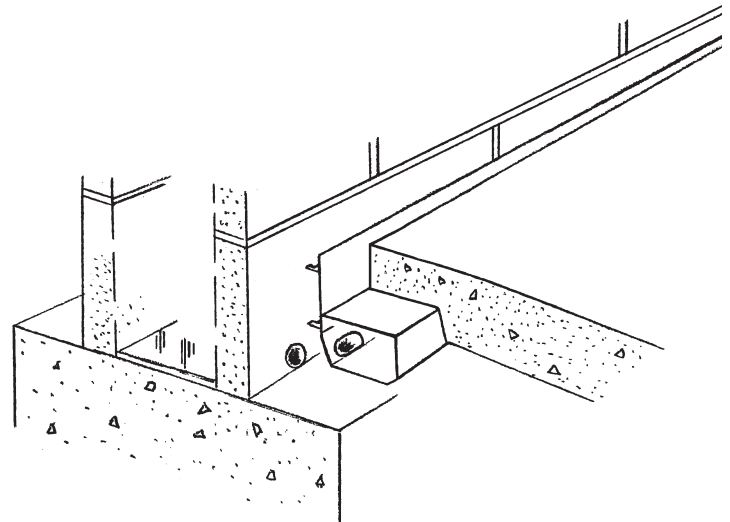

- WaterGuard® is engineered not to sit in the dirt, so clogging from silt and sediment under the floor is not a problem
- Special wall flange creates space between the floor and wall allowing wall seepage to drain while keeping dirt/debris out
- Works with all types of foundations
- Removable cover on WaterGuard port works well as an inspection port or continuous dehumidifier drain

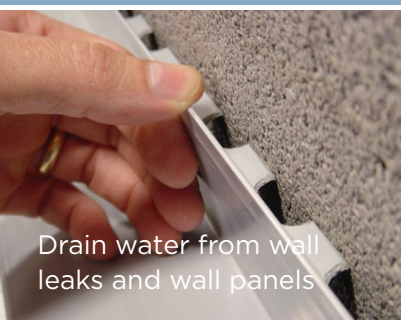

The WaterGuard® drains into our TripleSafe™ or SuperSump/UltraSump pumping systems to remove the water and keep your basement dry.

- Designed by Basement Systems Inc., the world leader in basement water control
- WaterGuard® has been fully evaluated by the Building Officials and Code Administrators Evaluation Services, Research Report No. 98.63

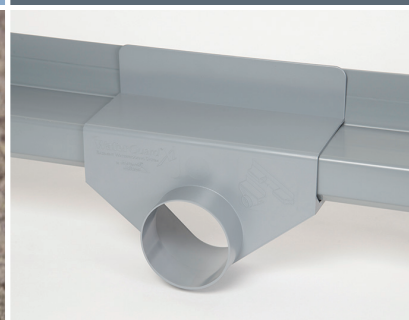

WALL FLANGES

Drain water from wall leaks and wall panels

DRAIN OUTLET

TYPICAL CLOGGED DRAINTILE

Other drains sit in the soil and can clog
