

# Permanently Stabilize Your Foundation Walls

PN #MBCAH

CARBONARMOR® & ARMORLOCK® SYSTEMS

## Happy Homes Demand Real Support.

**YOUR HOME IS PRECIOUS.** It's where you grow your family, welcome friends, and create lasting memories. Nothing should stand in the way of that. As your basement walls begin to crack, bow, and lean inward, the very foundation from which your life is built becomes compromised. Finding a permanent solution that addresses the true cause of your foundation problem is the surest way for you to get on with your life's happenings and enjoy peace of mind.

### How did your walls get this way?

As forces of nature, such as moisture and frost, interact with the soil around your home, the soil expands. That expansion results in constant inward force on your foundation wall until it can no longer support the pressure, causing cracking, bowing, and tipping.

# The Proven Solution

**THE CARBONARMOR® & ARMORLOCK® SYSTEMS** by Foundation Supportworks, Inc. permanently stabilize your home's foundation walls. CarbonArmor uses fiber-reinforced polymers (FRPs) which are ten times stronger than steel, yet flexible enough to contour tight against your basement wall. The ArmorLock brackets bind and secure the CarbonArmor straps to your floor joists making the CarbonArmor & ArmorLock Systems quick, non-invasive and ideal for quickly stabilizing bowing and leaning walls.

Best of all, installation can be performed year-round and often in less than one day. Restore your property value and enjoy peace of mind right away.

## Our Promise, Your Property

Rest assured that the CarbonArmor & ArmorLock Systems will immediately stabilize your foundation walls and permanently protect against any further inward movement. The CarbonArmor and ArmorLock solutions come with a 25-year warranty against manufacturing defects and a performance warranty from your local dealer.

## ADVANTAGES

Minimal disruption to the home

No disturbance to lawn and landscaping

Easily painted or concealed during basement finishing projects

Fast installation and cure times

## INSTALLATION

1

Prepare wall surface and secure ArmorLock bracket

2

Saturate application area on wall and CarbonArmor straps with epoxy resin

3

Adhere straps to wall and connect to ArmorLock bracket

4

Saturate entire system with top coat of epoxy
